Amount of the State Tax to be assessed in the Town of Rochester, the ensuing year, is 6,600 00 County Tax to be assessed in the town of Rochester, for the ensuing year, is 2,548 71

Amount of State and County tax for 67,

\$9,148 71

#### Statement.

Total amount of outstanding demands of every description against the town to the date of this Report, is sixty-two thousand two hundred ninety-two dollars and eighty-three cents, \$62,292 83

There is now due in Collectors' lists, two thousand four hundred thirty-five dollars and seventy-seven cents,\$2,435 77

Balance in the treasury in money and demand notes, three thousand two hundred forty-four dollars and twenty-nine cents

\$3,244 29

\$5,680 06

Balance of indebtedness,

\$56,612 77\*

Of the amount due the town from the United States Government for bounties advanced on soldiers assignments, as reported last year, there has been received three thousand and twenty dollars, (\$3,020), leaving a balance still due the town of three thousand four hundred and forty-two dollars (\$3,442), which sum is now considered worthless.

It will be seen that the cost of keeping the roads and bridges in repair the past season, has exceeded the amount raised for that object, by the sum of about twenty-five hundred dollars (\$2,500), which sum has consequently been drawn from the treasury, for which there was no provision made by the town. An assessment of one dollar upon a poll, and property in proportion, for a highway tax, and collected as last year, one half to be expended in summer and the other in winter, if needed, would seem to be the most judicious.

FISCAL YEAR ENDING MARCH 1, 1867.

TOTAL TRACTICAL TRACT

The Superintending School Committee in submitting to the town their Annual Report, propose first to offer a few suggestions, which, in our opinion, would greatly tend to promote the interest of our common schools. suggestion is, that in every school district great care should be observed in the choice of a Prudential Committee. should be one deeply interested in the cause of Education, and one who will seek the highest possible good of every scholar. Our second suggestion is, that in securing a teach. er, the Prudential Committee should cafefully consider the various wants of the district, and choose one who is adapted to meet them. It is a mistake often made, that a cheap teacher, will, do just as well and give more schooling. Such often prove in the end to be the most expensive. Our third suggestion is, the importance of all the parents in the district being specially interested in the progress of the school. To be thus, they should make it a point to visit it several times each term. The subject demands their interest. Their children need it. Students generally dread a failure before parents and friends more than before any other class of persons; hence, frequent visits from them would tend to stimulate children to greater diligence, as

well as to encourage the teacher. Our final suggestion at this time, is with reference to a comfortable place for study. There are several school houses in town which are unfit for that purpose, Much money is expended in them with but littld behalf to the child on therein that the infliction that ere long these wrecks, now called school houses, shall be removed, and neat, comfortable school houses fill their places.

We shall now proceed to report the schools by districts, in their regular order.

FISCAL YEAR ENDING MARCHIA,

Prudential Committee, Wesley B. Mills.

Prudential Committee, Wesley B. Mills. erts, an old and experienced teacher, who gave good satisfaction. The average attendance of scholars during the formula formula for the formula formula for the formula Summer Term was thirteen; duration, ten weeks. The Winter Term of about eight weeks was taught by N. B. Shapleigh, He kept an excellent school. school averaged sixteen scholars. No report has been sent scholar. Our second suggestion is, that in securing a teach er, the Pradential Congaint decided finity consider the Justin Brudential Committee, Gershom H. has taught in this District before, and has proved herself a thorough and efficient teacher. The school has made very marked progress under her instruction.

In concluding, we would urge upon the teachers and Prudential Committees the necessity of returning to the Superintending Committee the registers of their respective schools. Our report is not so complete as it would other

wise have been, in consequence of their remissness in this respect. The law requires that the registers should be examined by the Superintending Committee before the teachers can receive their pay.

Stale and hackneyed as is the theme of common schools, it is still a matter of the deepest interest to all who have at heart the well-being of the community. They afford the sheet anchor of our liberties. Without the intelligence which they diffuse, our liberty would degenerate into mere license and anarchy. A republican form of government is a mere impossibility, unless intelligence and education are diffused among all classes; and no system can be devised so efficient in promoting this object as our system of common schools. The lover of his race and country can engage in no task which will be more beneficial in its effects, and more surely win for him the lasting gratitude of the world, than that of perfecting our system of common schools. There is too much inclination to under-estimate their value. But though we would not under-value the importance of the higher institutions of learning, it is not too much to say, in view of facts with which we are all acquainted, that our common schools afford a course of instruction and mental descipline which will qualify a man to fill with credit the highest positions in the State.

#### Remarks.

of suppressing first and house a great blessing to the come The necessary expenditures upon bridges the past yearn has been unusually clarge do Garland's bridge at East ill a Rochester has been substantially rebuilt at a cost of about but so sixteen hundred and fifty dollars, (\$1,650,) one half, of which was sustaired by the town of Lebanon ... Isinglass bridge has also been almost wholly rebuilt at an expense of the will about six hundred and twenty dollars, (\$620), About two 1910 hundred dollars (\$200) has been expended in replanking Nor-ionia way Plains bridge, and about four hundred (\$400) in repair. ing smaller bidges, making upward of two thousand dollars (\$2000 expended upon bridges alone, Qur high, ways and bridges are now principally in good condition or Then total him amount of taxes assessed last year for the repairs of highways and bridges, was four thousand one hundred and sixty-seven dollars (\$4,167,) which we think has been for the most part judiciously laid out under the direction of the several high-way surveyors. Under the new statutes each poll is now estimated for the purpose of taxation at seventy five cents; consequently an assessment of fifty cents upon a poll, and estates in proportion for the repairs of highways and bridges the present year, will produce a larger tax than seventy-five cents upon a poll produced last year, which under the present condition of heghways and bridges, may be sufficient.

The fire department, as appears, from the Chief Engineer's report, (to which we refer for all matters of pressing importance,) is in good condition. The companies are well filled and a commendable spirit of rivalry prevails.—Fortunately we have had but few occasions for its services during the past year. Seven hundred and thirty-four dollars (\$734), have been expended in the purchase of leather hose, which, as will be seen by the Engineer's report, was indispensable to render the department reliable and efficient in case of fires. There is now no question that if an iron pipe should be extended through our principal streets, similar to the one already laid to the square, it would be in the end the cheapest and most efficient means

Rochester, March 1, 186%.

of suppressing fires, and hence a great blessing to the community. The total cost of pipe when completed, together with the hydrants, would not probably exceed one dollar and twenty-five cents per linear foot, and when once com-

plete would be permanent and durable.

The number of paupers now at our Almshouse is only twelve, which are permanent boarders. The whole number admitted to the almshouse during the year including those who remained April 1, 1867 is forty, besides entertainment occasionally to destitute travelles. Some necessary repairs have been made the past year on the old farmhouse, which will answer very well for a numbers of years without much more expense on allegion a wear our moleral air met of these a woved her year be, the reference that

form A. (gl. 186). The model of the property of the form of the second o

the community has even made for a distributed in the fall of the fall of the formal of the fall of the

The Secretal Contestall and English I

It is made the duty of the Chief Engineer by statute to make report annually to the town, of the condition of all the apparatus under his care belonging to the town, and the amount of expenditures for repairs thereon. When the present board of engineers took charge of the machines and apparatus of the fire department, they requested the officers of the several companies to make report to the board of engineers, of the condition of the machines and apparatus, which they did.

In the report of Cochecho Co., No. 1, it is stated; "The leather hose are very old and rotten, and will not resist the pressure of a full company with ordinary force, and have become almost worthless." In the report of Torrent Co., No. 2, it is stated; "That two hundred feet of leather hose are bad, virtually worthless, and one hundred feet will answer with small pressure."

In the report of Tiger, No. 3, at Gonic, it is stated; "One hundred and fifty feet of leather hose must be repaired before they can be used, and it is very necessary that we have a new hose pipe." In the report of Torrent Co., No. 5, East Rochester, it is stated; That the hose are good for nothing for service, and that two pieces of suction hose are wanted; also three suction hose spanners, and one large wrench."

After considering the reports, and examination of the several macinhes and apparatus, we report to the Selectmen of the town, that such articles should be furnished.

At the last annual meeting, the town appropriated one

thousand dollars toward erecting an Engine House at East Rochester, for Torrent Engine Company, No. 5. A good building has been erected, and the members of the engine company at that place have taken their funds and appropriated the same toward the erection of said house, and when the same shall be completed it will be the property of the town, and it is but just that the town should at the proper time vote such further sum to complete the house and repay what the company has expended out of their funds in the erection of the same, as has heretofore been voted in aid of other companies. A new Engine House is required for Tiger Co., No. 3, at Gonie, the present house is insufficient to properly protect the engine and apparatus. The Engine Houses, for Cochecho, No. 1, and Torrent, No. 3, in Rochester village are good buildings and in good repair.

The several machines are in good order, the apparatus (other than the hose) are in good order. More leather hose are necessary for the efficient operation of the machines in case of fires. The purchase of the hose the past year was an absolute necessity, and had not such been turnished, the machines at the large fire at the factory and in the stable near the lower Hotel could not have been operated with any degree of success.

The one thousand dollars raised at the last annual meeting for an iron pipe from the hydrant in the factory yard, to the cistern on Central Square, near the liberty pole, has thus far proved a perfect success. There is a hydrant on the square near the liberty pole, has thus far proved a perfect success. There is a hydrant on the square near the liberty pole, and one in the front yard of the house of Harrison Hale, nearly opposite the store of Messrs Hodgdon & Bickford, on either of which hydrants several hundred feet of hose can be attached, and water thrown in or over any building within that distance. With the force now so liberally furnished to the town by the factory company, these hydrants are more efficient in their locations than a Steam Fire Engine. There are about six hundred feet of four inch prope which cost (all was hundred feet of four inch properties).

The first quality of two-inch leather hose including // couplings, cost \$1 80 per foot, demonstrating the fact that

At the last aimed meeting, the town appropriated one

water can be supplied in the several parts of the village at less expense in four-inch iron pipe, than in two-inch leather hose.

Forty good men are appointed to each Company, including and Officers and of infant saw, adapt it to until their act.

It must be apparent to every tax payer in this town that the protection of the property in the three villages in town is of great interestico all; many laborers are employed therein; a good market is opened, and a large amount of taxes are paid. And it is but just to say that for ten years last past, the town has promptly granted liberal aid to its fire department, and had not such aid been granted, on several occasions our villages must have been laid in ashes, and the town seeing the good results of such appropriations it is hoped that they will as heretofore, grant such aid as shall make the Fire Department an efficient organization in time of need.

### REPORT

OF THE

## SUPERINTENDING SCHOOL COMMITTEE

FOR THE YEAR ENDING MARCH 1, 1868.

The Superintending School Committee in accordance with the requisitions of the statute make the following report of the schools in the town of Rochester.

#### District No. 1. HOLL

Prudential Committee, Amasa Allen.

The Summer Term was taught by Miss Margaret Ayers, who kept a good school. She was interested in the moral culture of her pupils, as well as in their intellectual training. Average attendance of scholars during summer term 12. Length of school 10 weeks.

The Winter Term of 11 weeks, was taught by Charles of D. Fall, who though a young teacher succeeded well, both if as instructor and disciplinarian Average attendance of salt scholars during Winter Term 18. Length of school 11 weeks.

## taxes are print. And it is but his to be a that it if a grain series in it is but the touch are penalty in the touch are penalty in the touch are penalty.

Prudential Committee, Paul Libby, January of and

The Summer Term was taught by Miss Amanda Nute, who gave very general satisfaction. Length of school 12 weeks. Average attendance 11.

The Winter Term was taught by Miss A. E. Ham. Though this teacher has had but little experience in teaching, the improvement made by the school under her teaching was quite marked. Average attendance, 11. Length of school, 15 weeks.

#### District No. 3.

#### Prudential Committee, Ira L. Bickford.

Summer Term was taught by Mary H. Hayes. Number of scholars —. Order and progress very good.

Winter Term was taught by Mr. Isaac W. Hanson, Number of scholars 37. Progress as good as might be expected though with a deficiency in order.

## District No. 4.

#### Prudential Committee, Hiram S. Osborne. 19 351 481 /

Summer Term was taught by Miss Abbie E. Jenness. Number of scholars 11. She gave good satisfaction.

Winter Term was taught by Mr. David M. Wiggin. Number of scholars 13. He is a young teacher but did well.

#### District No. 5.

Prudential Committee, Stephen H. Bickford.

Summer Term was taught by Miss Erminia Ingraham. Number of scholars 10. Interest and progress good.

Winter Term was commenced by the same teacher who taught about three weeks, then wished to leave to take charge of a school in Dover. The remaining part of the term was taught by Mr. James M. Hayes. Number of scholars 14. On account of sickness the Committee was not able to visit his school but can report that he gave good satisfaction.

#### District No. 6.

### Prudential Committee, Dudley W. Hayes.

Lottie A., Ham teacher Number of scholers for the Summer Term was 12. The interest, order and progress were very good. The number of scholars for Winter Term was 17. The interest on the part of the teacher and of the most of the scholars was very commendable, but with a few

it was otherwise. Two, for open violation of the rules of order, were expelled for the Term political Control of the rules of

Miss Hattie Tilton taught the Summer school. She is a very efficient and energetic teacher.

Miss A. G. Watson taught the Winter school. Her mild and gentle manners secured the affections of her pupils, and the results of her ministrations as teacher were very beneficial to the school in every respect. Number of scholars 13. Length of school 16 weeks.

#### ust of manny a District No. 19.

Prudential Committee, S. F. Shorey.

Miss Fannie E. Rankin was the teacher during the Summer Term. She is a good scholar and successful teacher. The school is large and difficult to govern, but it made good improvement under her instruction. Number of pupils 43. Length of school 12 weeks.

The Winter school is now in progress. It has been keeping but 4 or 5 weeks. It has been

## harond ( ) in. I will Prudomial Counties. OS. co. No. 2011 District County of the contract of

Prudential Committee, George A. Drew.

Both Summer and Winter Terms, amounting to 16 weeks, were kept by Miss C. N. Nute. The school in this District is very small and backward, but they have made very decided advancement during this term. Number of scholars, 10.

We have noticed as one of the most serious obstacles in the improvement of our schools, a great disposition among District Committees to employ cheap teachers. The wages of teachers have felt the universal appreciation of prices which has been taking place for the last five or six years.

aliquit work to reach it out pains \$321 in luless one year uso in their studies. The school was very ranch qualited by This is submitted to as inevitable in almost all other (cases where the relation of hirer and hired exists. A farmer has no hesitation in hiring a man whom he knows to be capable and trusty and master of his business, and paying him two dollars a day, even though he could obtain the services of an inferior and inexperienced workman for half that blassum, and knows that it is much more profitable to employ the man at two dollars. But when this same farmer occupies the situation of Prudential Committee the shrewdness and good judgment which marked his choice of a laborer to till his field seems suddenly to desert him in this new position, and because he can hire a person for ten or fifteen dollars a Winter less, he flatters himself that he has made a great bargain, though the teacher employed may roll besentirely unsuitable to mould youthful character. His attainments may be so small that it is only by the exercise of great adroitness that he prevents his poverty in this respect becoming apparent to his pupils. And as for interest in his vocation he openly proclaims that it is in all its respects utterly hateful to him. Until Prudential Committees come to recognize that there are different degrees of merit among teachers, and that it is the poorest kind of economy to employ teachers whose only ment perhaps is that they can be hired for five or ten dollars less per month than another of well established reputation, the grade of our schools will always be low. There are backward schools in this town that will always be backward so long, as this onwise niggardliness is practised. Descrict Committees to engine) eggentlement
